

MEG Study

at the

KIT/NYU MEG Lab

***PAID STUDY -- Subjects from previous MRI studies
needed!***

Must be 18 years or older.

Name of study: MEG Study of Psychophysics and Language Processing

Purpose of study: This study is designed to investigate brain responses to language, as well as to simple sounds and images.

Name of experimenter: Dr. Alec Marantz, NYU Department of Psychology

Location of study: KIT/NYU MEG Lab, 6 Washington Place

Specific requirements: Native English speakers only please.

Type of activity: In this experiment you will be presented with words and/or sentences. Your task will be to indicate whether these are real English words and/or whether the sentences sound grammatical to you. You will also be presented with simple images and sounds, which you will be asked to passively attend to.

Length of time: Up to 1 hour

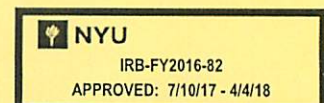

Remuneration: \$15 per hour
