NEW YORK UNIVERSITY
DEPARTMENT OF PSYCHOLOGY

PAID STUDY -- Must be 18 years or older.

Name of study: Perceptual learning in amblyopia

Purpose of study: To learn more about the way amblyopic adults see the world and how attention affects their visual performance. Your participation may help us develop treatments for adults with amblyopia.

Name of experimenter: Mariel Roberts

Name of faculty supervisor: Marisa Carrasco

Location of study: Carrasco lab, Room 970
                   Meyer Building, 6 Washington Place, New York, NY 10003

Specific requirements: - Male and female adults over 18
                      - Must be clinically diagnosed with strabismic (i.e. lazy eye) or anisometropic amblyopia, i.e. reduced vision in one eye caused by abnormal visual development early in life.

Type of activity: Participants will be asked to look at visual stimuli on a computer screen, make judgments on the characteristics of the visual stimuli and report them via a button press.

Approximate length of time: 1-1.5 hours a day for up to 15 days; sessions cannot be more than 2 days apart

Remuneration: $15 / hour
