Revised February 08

## Parental/Guardian Permission Form for Department Pool Participants Earning Money

Your child, \_\_\_\_\_, is invited to take part in a study named *Language Skills*. The study is designed to learn more about the relation between the body's endocrine system and aspects of language skills. It is being conducted by May Ling Halim who is the principal investigator, as part of her graduate training. The faculty sponsor of this work is Professor David Amodio.

If you give permission for your child to be in this study, he/she will first be asked to fill out several questionnaires online on his/her personality and attitudes. This first part of the study will take about 1 hour. Next, he/she will come in person and be asked to do the following: (1) take a short language skills test, (2) complete some computer tasks involving making judgments about words and objects on the screen, and (3) provide several saliva samples by letting his/her spit drip into a vial. This second part of the study will take about 1 1/2 hours. Your child's total participation will take about 2 1/2 hours. Your child will be paid \$25 for completing this study. When your child completes the study, a thorough verbal and written explanation of it will be given to him/her.

There are no known risks associated with your child's participation in this research beyond those of everyday life. Although your child will receive no direct benefits for participation in this study, it may make him or her more aware of how knowledge is discovered in psychology and help the investigator better understand the relation between the body's endocrine system and aspects of language skills.

Taking part in this study is voluntary. Not taking part or withdrawing after the study has begun will not affect your child's grade or academic standing in any way. If your child withdraws at any time, your child's payment will be prorated for how much he/she completed. Your child has the right to skip or not answer any questions he or she prefers not to answer.

Confidentiality of your child's research records will be strictly maintained by assigning unique, confidential identification numbers codes to your child's responses. Your child's responses will not be associated with your child's name, and will be pooled with the responses of other participants for analysis. The data from the study will be kept until 5 years after publication, as recommended by the American Psychological Association, and then destroyed by shredding.

If there is anything about the study or taking part in it that is unclear or that you do not understand, or if you have questions or wish to report a research-related problem, you may contact the principal investigator, May Ling Halim. She may be reached at (212) 998-7750, [mayling@nyu.edu](mailto:mayling@nyu.edu), 6 Washington Place, Room 764. The faculty sponsor, Professor David Amodio, can be reached at (212) 998-3875, [david.amodio@nyu.edu](mailto:david.amodio@nyu.edu), 6 Washington Place, Room 782. For questions about your child's rights as a research participant, you may contact the University Committee on Activities Involving Human Subjects (UCAIHS), NYU, (212) 998-4808 or [ask.humansubjects@nyu.edu](mailto:ask.humansubjects@nyu.edu), 665 Broadway, Suite 804, New York, NY 10012.
